

Conflict or Commentary?

Comparing Nigerian News Coverage to Boko Haram Conflict Intensity

Zach Einolf | SURV727 Final Project

Project Overview

- Question:
 - Does the tone and sentiment of Nigerian news reporting on Boko Haram-orchestrated terrorist attacks align with the actual intensity of said events?
- Data:
 - Armed Conflict Location & Event Data (ACLED) project API
 - Text data scraped from TheInformant24/7, Mega News, and TheNewsHunter Blog

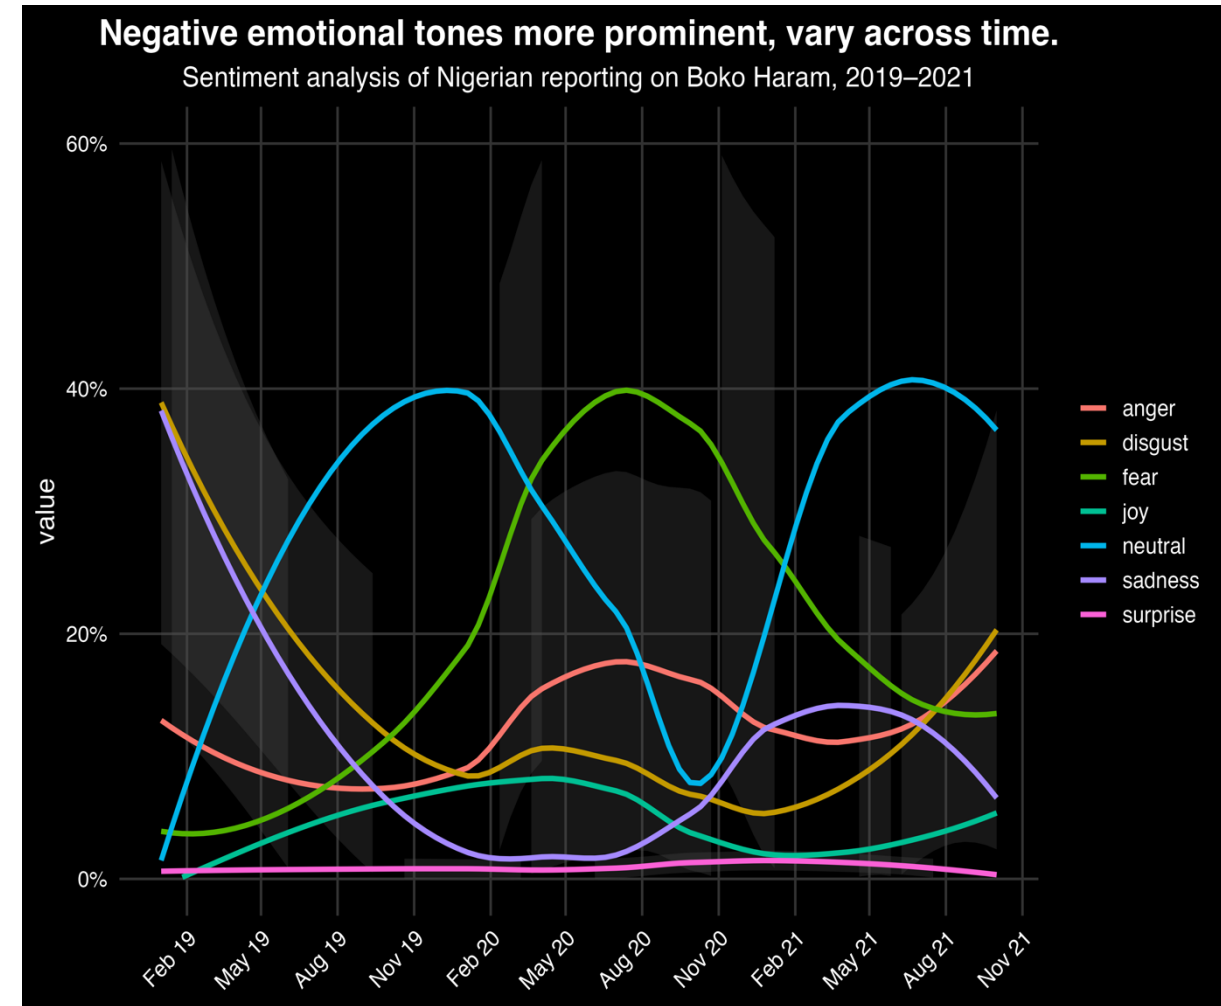

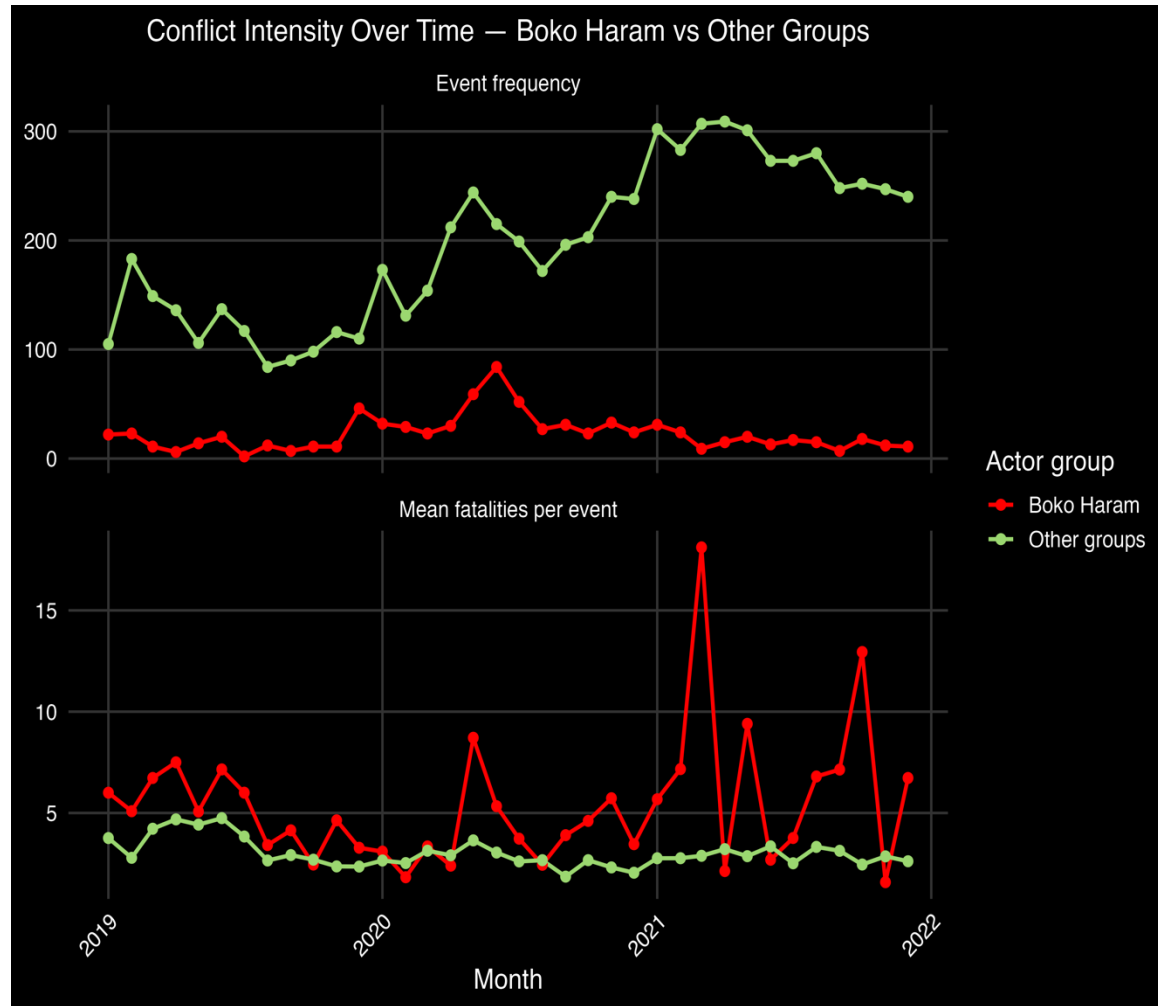

Source: TheNewsHunter Blog

Boko Haram insurgents have raided Kuda village on Monday evening in Madagali Local Government area of Adamawa state Northeast Nigeria killing 23 people and injuring many others, while some that flee the village are yet to return. Kuda village is situated along the border of Sambisa forest, den of Boko Haram and has been a target of attack since Boko Haram started launching attacks on communities in the area for almost ten years now due to resistance from the community on an attempt by the insurgents to attack the village on various occasion.
